

Partnering to Realise People Potential.

With over 40 years of industry experience, Evalex delivers extensive assessment, talent management and leadership development solutions to identify and realise people potential. We are pioneers in using Artificial Intelligence (AI) in our systems, data, and research, and we have used this expertise and a strong client partnering focus to develop our solutions. These solutions integrate into an ecosystem that provides our clients with reliable and valid information to enable sound talent decision-making.

We develop and deploy solutions for the assessment of people potential in the areas of ability, personality dynamics, team styles, interests, values, culture, and leadership capability. Extensive research underscores all our products, ensuring accuracy and reliability in every assessment we provide. Furthermore, our partnership approach means we personally walk your talent journey with you.

As a 'TalentTech' company, our technology goes beyond merely integrating assessments into a delivery system. Our extensive experience has allowed us to amass a vast amount of data that underpins our research and development in the use of AI, machine learning and neural networks.

In a first of its kind, we have developed a digital and virtual psychologist called the Evalex Virtual Assessor (EVA) that interprets assessment results at a level of sophistication more progressive than what is typically found.

We have designed and developed various assessments, products and solutions such as the Evalex leadership simulations, Evalex psychometrics, Evalex Video Interviewing Assessment (VIA), Odyssey gamified, high volume, "entry into the world of work" assessment, and the Evalex Leadership Evolution and Acceleration programme (Elea).

Our heritage, research, partnership, and technology focus allow us to engage and assist our clients to 'realise people potential'.

Partnering • Heritage • Technology
