

# Future Skills

## Assessing and Identifying the Talent that Will Shape Tomorrow

- **Presentation:** A presentation is a structured delivery of information or insights by an individual or group to an audience, typically supported by visual aids like slides.
- **Mini-Symposium:** A mini-symposium is a focused, multi-speaker event where experts present and discuss their research or findings on a specific topic within a limited timeframe.
- **Panel Discussion:** A panel discussion involves multiple experts or stakeholders discussing a particular topic in front of an audience, often moderated to facilitate conversation and audience questions.
- **Ignite Session:** An ignite session is a fast-paced presentation format where each speaker has five minutes and 20 slides that automatically advance every few seconds to share their ideas or stories.
- **Master Class:** A master class is an in-depth, often interactive, session led by an expert in a particular field, designed to teach advanced skills or knowledge to participants.
- **Workshop:** A workshop is an interactive session where participants engage in activities and exercises to develop skills or knowledge on a specific topic, often facilitated by one or more experts.
